

# Hilux 05-on Tow Point

Roadsafe have upgraded the hardware kit included with the Tow Point to suit Hilux 05-on. This upgrade has resulted in the inclusion of both standard and stepped Crush Tubes to provide internal crush resistance in the chassis rail in the event mounting bolts are over-tightened, in addition to providing a more secure fitment through the chassis rail.

RP-HIL05V2 points will not fit with Factory or some Aftermarket Bull Bars that utilise the chassis mount holes required for tow point installation.

## RP-HIL05V2

Part Number RP-HIL05V2

Description Hilux 05-on Tow Point

Barcode 9319478603585
