Rear Lower Trailing Arm Prado 120 & 150, Cruiser 200 & FJ

After a multitude of requests, Roadsafe have developed a Rear Lower Trailing Arm to suit for a number of Toyota models. Manufactured to standard length, this item can be fitted as a 'stronger' replacement for stock height vehicles. With offset ends, to allow for rear diff clearance, the same arm can be utilised on lifted vehicles. More robust than genuine, the Roadsafe arm is manufactured from 34mm OD tube with 6.5mm wall thickness to allow for increased strength. The Roadsafe arms are supplied complete with Rubber Bushings made to OE sizing specifications, meaning... If you want to replace the bushings with OE at any stage, you can! Roadsafe arms are also supplied with Black E coating for the more discreet look.

Offset Ends for rear diff clearance on lifted vehicles
