

"Hilux IFS 2005-on" Easy Lift Kits

To make lifting the IFS Hilux easy we have put together some 'Easy Lift kits'. These kits offer approx. 2.75-3" lift in the front & 2" lift in the rear. Because some customers prefer to upgrade their rear shackles at the same time we have put together two kits. Kit 1 gives the customer the standard option, providing the rear lift with Suspension Lift Blocks. Kit 2 gives the customer Extended Greasable Rear Shackles, thus offering a shackle upgrade in addition to rear height increase. 'Easy Lift Kits' come complete with the Roadsafe 4WD Diff Drop Kit so the customer can realign their front diff, thus reducing angle & subsequent wear of the CV's.

Plus... Because you are purchasing as a Pack we have been able to manipulate the pricing to give you a better price than purchasing all components individually!
