

Roadsafe 4WD - New Catalogue

The long awaited 'Edition 1' Roadsafe 4WD Catalogue is now available from Roadsafe.

Roadsafe 4WD offer a high quality, affordable range of components specifically for the 4WD market. Roadsafe have been supplying passenger vehicle chassis components in Australia for over 30 years, and have a very strong reputation in the Australian Automotive Aftermarket.

Roadsafe offer Australia's largest front end range, with new product constantly in development. As a testament to quality and supply ability, Roadsafe supply to many of the leading distributors in the industry.

Several years ago a new program was initiated focusing on the 4WD sector. Recognising a need for high quality components and consistency in supply, Roadsafe 4WD was launched and has quickly developed a large range of essential Steering & Suspension, and associated components for the 4WD industry.

Be assured when you purchase Roadsafe 4WD branded suspension products, you will have a top quality item, fully warranted, and developed to suit Australian conditions.

The new 36 page catalogue clearly outlines the Roadsafe 4WD product range, featuring upgraded standard replacement parts through to competition vehicle upgrade components.

The Roadsafe 4WD range consists of over 235 specific numbers, covering over 400 vehicle applications – all catalogued in this new Edition 1 publication.

In addition, Roadsafe 4WD also offer a standard range of over 500 4WD specific replacement components such as Ball Joints, Tie Rod Ends, Sway Bar Links, Idler & Pitman Arms – that can be located and cross referenced in the Roadsafe passenger vehicle catalogue.

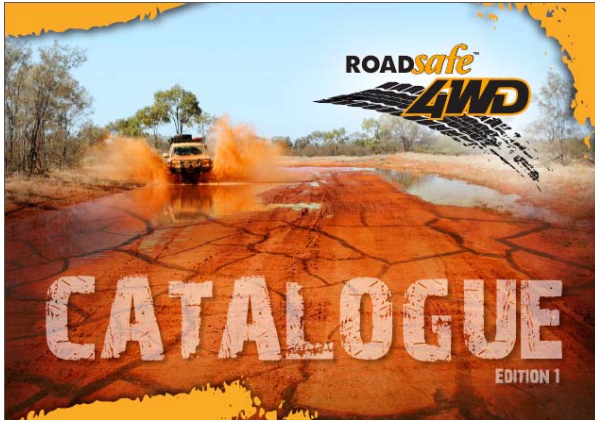

The new Roadsafe 4WD catalogue is not just a listing of part numbers however, the book also features a lot of explanatory information, pictures and advice on suitable components to really aid the end user in making the right decision for their vehicle.

In a deviation from their regular design, the new Roadsafe 4WD catalogue has been designed in Landscape, to enable each page to be fully utilised in the most suitable format. Additionally, each component has been listed with Recommended Retail Pricing (RRP's) to make pricing a breeze.

In addition to the new Roadsafe 4WD Edition 1 Catalogue, Roadsafe 4WD have also designed a complimentary DL Flyer and Authorised Stockist Core Flute Sign, available now. Please see images below.

In keeping with the new theme, please keep your eyes peeled for Roadsafe 4WD ads in both **Dirt Comp** and **Extreme Offroad Addiction** Magazines, starting January 2013.

ROADSAFE 4WD CATALOGUE

ROADSAFE RADIUS ARM SPACER WASHER

Designed to fit OD and DU threads with out from, the Roadsafe Radius Arm Spacer Washer is primarily used to 'push' the front diff forward (approx. 15mm) to give better clearance for larger tyres than the stock front diff tubes and pivots. Another common issue with the factory front diff tubes is the standard radius arm washers to band together causing uneven spacing, which can result in premature failure of the arm. Bigger spacers also generally mount bigger spacers with longer spacers. This increases the load on the radius arm rubber bushings, causing them to distort or become dislocated. The High Quality Roadsafe Radius Arm Spacers, being stronger than standard washers, reduce bearing and set in radius arm geometry. The Roadsafe Radius Arm Spacers are also designed to work at 60° for the rubber bushing, preventing it from becoming dislocated in an uneven loading geometry.

Part Number	Application	Price RRP
ROSAW	Newer Patrol OD OD with Coil Over	\$50.00

It is recommended that you check the clearance from your diff to your partner rod, as full compression, before and after fitting the Radius Arm Spacers. The front diff and Off Road Pumpkin run very close on some DU Patrol depending upon other suspension work that has been done on the vehicle. Pushing the diff forward with the spacers can result in the partner rod making contact with the diff or the front of the radius arm, affecting the articulation of the partner rod, which can place excessive stress on the partner rods and brackets, leading to premature failure.

ROADSAFE TRANSMISSION SPACER KIT

The Roadsafe Patrol Transmission Spacer Kit aids in controlling the driveline vibration and noise after a lift is installed. The transmission spacer plate is mounted between the transmission plate and the chassis, and works by absorbing the driveline misalignment caused by the lift.

Part Number	Application	Price RRP
ROSTR	Newer Patrol OD OD	\$75.00

Roadsafe Transmission Spacer Kit includes 4 precision cut 6mm spacer plates, and fitting hardware to suit (standard bolts). The four spacers allow you to run either 6mm or 12mm, depending upon your lift.

Why Roadsafe?
With Australia's largest range of Steering and Suspension components as their staple, Roadsafe offers you an affordable solution to your 4WD needs. Roadsafe offers a full range for both raised and standard 4WD vehicles. Panhard Rods to correct axle alignment, Extended Sway Bar Links to regain your sway bar, Radius Arm Spacers to reconnect your DR, plus much more.

A number of Roadsafe items are designed to enhance the performance and abilities of your 4WD. While many additional items are available to correct the changes experienced when a lift is installed.

Roadsafe use real 4WDers to aid in the design and real life testing of their products. It's OK to do tests at the local testing facility, but there is no better testing work than those around Australia! That is where the testing occurs and that is where Roadsafe pick up design tips, changes and upgrades.

When you buy a Roadsafe Product, you can be sure that it has been designed by Aussies for all the conditions that can be thrown at it in our far wide land.

IMPROVE ARTICULATION

IMPROVE ALIGNMENT

www.roadsafe.com.au

Adjustable Panhard Rods

An absolute necessity on all raised 4WDs is the Adjustable Panhard Rod. Designed to correct axle alignment, the fitment of an Adjustable Panhard Rod eliminates potential contact between tyre and body, and improves handling issues on vehicles lifted 2" +.

All Roadsafe Adjustable Panhard Rods are Heavy Duty, single thread cut, air adjustable, and come complete with bushings and steering damper mounting brackets where applicable.

Adjustable and Upgraded Drag Links

Roadsafe offer a full range of Heavy Duty Drag Links and Track Rods to suit for a range of Aussie found 4WDs. It's not a case of 'one size for all' at Roadsafe. The range includes a 'Stump' upgraded version, a 'Giant' 4WD version, and the ultimate 'MP' Config style in 4140 Chromoly Steel. Available for domestic Landrovers & Patrols.

Even the 'Stump' version is a huge upgrade over standard, featuring 30mm OD with 6.5mm wall thickness, in addition to Heavy Duty replaceable tie rod ends.

REAR TRAILING ARMS - UPPIERS & LOWERS

If your Rear Lower Trailing Arms have taken a knock, and resemble something a little too bent, then it's time for a new one! Your Rear Lower Trailing Arms on Patrols & Cruisers should not look like that!

Roadsafe Rear Lower & Upper Trailing Arms are built tough, so when you bang them up against rocks & tough terrain, they won't bend as much as the standard items. You've got to really give the Roadsafe ones a decent smack to get the 3mm wall thickness to buckle. We're not claiming Roadsafe arms are infallible, there will always be a bloke who wants to bang his truck up by the lower rear arms with bending components, but for your average 4WD one set of Roadsafe arms should get you through the life of your truck.

MINE IS BIGGER THAN YOURS

Extended Sway Bar Links & Extensions

Roadsafe offer a range of upgraded extended Sway Bar Links for the Patrols and extensions for the 800/100 series Cruisers. If your Sway Bar is out of alignment, handling can be affected. Realign your sway bar with Roadsafe Sway Bar Links & Extensions.

IMPROVE STRENGTH **IMPROVE HANDLING** **IMPROVE RIDER**

Additional 'Hard Core' & 'Comp' Items

Other items covered by Roadsafe that you might consider to improve your truck are...
