

Press Release – Immediate Release 21st May 2014

Roadsafe Battery Trays

Roadsafe 4WD has expanded its range of 4WD Auxiliary Battery Trays to include a new Multi Fit (Under Tray) mount Battery Box.

The Roadsafe Battery Tray range features 12 numbers covering 26 vehicle specific applications, plus additional multi-fit possibilities (tub & tray mount).

Roadsafe 4WD Battery Trays are designed & manufactured in Australia.

“We have built our battery tray’s tough, because we know the locations they are going to be tested. From extra leg mounts to thicker steel gauges, the unique design process is instilled in every battery tray we offer.” said Tania Allatt, Roadsafe Marketing Manager.

The new Multi Fit (Under Tray) mount Battery Box fits under just about any tray back utility. The tray requires a fitting area of 455mm long x 175mm wide x 320mm deep for adequate clearances. Manufactured in Australia from 3mm steel, laser cut, folded and silver zinc coated, the new Multi Fit (Under Tray) box comes complete with 5mm thick mounting brackets. The new tray (part number BT039) will fit up to a 330mm long battery (120Ah).

“With the limited space available in modern engine compartments, we have to start looking outside the square with regard to auxiliary battery placement. The new Multi Fit Under Tray box is a great design to use ‘wasted space’ to locate the second battery. Best of all, the new design is out of the way, and fits under just about any tray back ute” said Tania.

Made in Australia, the Roadsafe 4WD Auxiliary Battery Tray range is second to none! Built tough to go the distance.
