

4WD “Long Rod” Display Stand

Roadsafe Automotive, distributor of Australia’s largest range of Steering and Suspension components, have designed & produced a new stand for store display of the key 4WD ‘Long Rods’.

As all Patrol & Cruiser drivers would be aware, there are many “Long Rods” on their vehicles, ranging from Panhard’s, Tie Rods & Drag Links. All items are difficult to store at reseller level due to the size and weight of the Heavy Duty items.

The new 4WD “Long Rod” Display Stand takes all the hassle out of storing the rods, plus turns the whole program into an easy to manage display.

The 4WD “Long Rod” Display Stand holds the top 12 rods, and comes complete with a Clear Application Chart for all items included on the display.

The display has been placed on wheels, so can be moved around shops to any suitable location.

The stand is available for sale to Resellers as either an individual item, or a package deal including all relevant rods.

For more information, please consult with your Roadsafe Territory Manager during their next visit – or, for new customers, give Roadsafe a call on 1300 651 551.
