

## Roadsafe – GU Patrol 1/2" Drive Hub Socket

Roadsafe Automotive, distributor of Australia's largest range of Steering and Suspension components, have added a 1/2" drive hub socket to suit for the hub setup on the late GQ's & GU Patrols.

As all Patrol drivers would be aware, the hub nuts in the late GQ's and GU are circular, with holes that require pins to slot in and turn. They are not shaped like a "normal" nut with square edges. The Roadsafe hub socket has the pins that slot into the holes, and facility for your 1/2" drive socket to be used to tighten or remove the wheel bearings.

Sure you can make your own, but for RRP \$49.95... why bother!

For more information, or a distributor near you, please check out the Roadsafe website [www.roadsafe.com.au](http://www.roadsafe.com.au) or contact Roadsafe on 1300 651 451.
