

Weight Distribution System suits 135-365kg Ball Weights

Mister Hitches Weight Distribution Hitches evenly distribute weight over the entire length of the towing vehicle and trailer, resulting in a more level ride with more control and stability. Weight distribution hitches also deliver better braking, less strain on the towing vehicle and increased towing capacity. Distributes weight to all axles. Provides positive towing control. Add even more control against sway with Mister Hitches Sway Control Device. The sway control simply attaches to your weight distribution hitch to minimize sway caused from high winds, curving roads or quick manoeuvres. (The Sway Control is not suitable with override brakes).

NOTE: ALL MISTER HITCHES PRODUCTS COMPLY TO ADR WHERE APPLICABLE
