

Nissan Patrol GQ-GU Hybrid Style Radius Arms

Roadsafe teamed up with Unlimited Industries to get the new Hybrid Style 4" Dropped Radius Arms up & running. The Roadsafe Radius arms are a hybrid design that include a change in the rear to a radial type bushing rather than the failure prone pin style, and the improved handling of a low profile drop box style mounting. These features work together to allow the arms the ability to really absorb the bumps and keep the wheels on the ground for better handling, without sacrificing articulation. Roadsafe Radius Arms are precision flame cut from massive 32mm thick solid S45C Mild Steel, and include tapped holes for ABS lines & sway bar mount (2nd gen style) as standard. Arms are supplied complete with High Flex Rubber Bushings (factory spec dimensions) installed to the high tensile bushing eyes. Arms and Drop Boxes are finished in black E-coating for maximum durability and rust prevention.

RANPB

Part Number **RANPB**
Description **Radius Arm Kit**
Barcode **9319478605961**
