Description: **Campa Pan 20"**  
Barcode: **9319478621077**

**The 'Big Boy' version!**

Place hot coals or HEAT BEADS® on the lid.  
**The lid doubles as a frypan.**

Strong Mesh Trivet gives you better convection airflow for efficient cooking. Allows fat to run off giving you healthier food, and stops food from sticking to heated base.

Camp oven base doubles up as a saucepan for boiling.

Place hot coals of HEAT BEADS® under the oven.

**Camp Pans & Ovens are made from high quality spun steel. The durability of spun steel ensures the camp pan or oven will not crack or split if accidentally dropped, giving you a long lasting cooking utensil.**
