Bar Code: 9319478619142

**RTH004**

Part Number: RTH004

Bar Code: 9319478619159

Thanks for the feedback! Initially released in Red only... due to popular demand we have expanded the range to include BLUE & GOLD too. So now, It's just cooler because it's red, blue or gold! Now available are red, blue & gold 50mm recovery hitches in aluminum with WLL 5000 kgs. All Roadsafe 4WD tow points & hitch designs are destruction tested during development to ensure they are rated at a level they can withstand. The new alloy hitch destruction testing was halted at 16 tonne due to test equipment limitations, with no signs of deformation with the hitch at this force. If there's another colour you want us to consider - let us know! if demand is there we will certainly add it to the range.

# Now Available
