**Standard Length**

**RTH004**

Part Number: RTH004  
Bar Code: 9319478619159

**Extended Length**

**RTH005**

Part Number: RTH005  
Bar Code: 9319478620773

New to the Roadsafe range are 'EXTENDED' Rear Tow Points (in Alloy Gold). Gold 50mm recovery hitches in aluminum with WLL 5000 kgs, extended to suit for vehicles with difficult to access receiver locations. All Roadsafe 4WD tow points & hitch designs are destruction tested during development to ensure they are rated at a level they can withstand. The new alloy hitch destruction testing was halted at 16 tonne due to test equipment limitations, with no signs of deformation with the hitch at this force. If there's another colour you want us to consider - let us know! if demand is there we will certainly add it to the range.
