

Nissan Patrol GQ-GU Hybrid Style Radius Arms

Some customers like to use GENUINE rubber bushings. So in order to ensure those customers are not discriminated against Roadsafe now have the Patrol Radius Arms available with optional Genuine Rubber Bushings. The rubber bushings (part number S0501RG) are also available for individual purchase. When you place your Patrol Radius Arm orders, please ask for RANPBG if you want the arm pressed with GENUINE rubber bushings.

The Roadsafe Hybrid style Patrol Radius Arms are supplied complete with tapped holes for ABS lines & sway bar mount (2nd gen style) as standard. The 2nd Gen style sway bar mount has the wider saddle bracket mount. If the vehicle has the narrow (earlier) sway bar mount saddle, a Universal Bracket & mount bushings to suit will need to be purchased with the RANPB or RANPBG kit.

Universal Mount Saddle Part Number **W21301**
