

Heavy Duty Tow Points

Nissan Navara NP300 (D23)

The new heavy duty Tow Point to suit Nissan Navara NP300 (D23) have been kitted to allow for fitment with either no bar, Ironman or ARB Bull Bars. With 5000kg working load limit, the points are a perfect suit to the new NP300. The design of the points allow for the pulling force to be in-line with the mounting, mounted behind the crush area the extended length nose (compared to the RP-NAV40 points) allows easier access to the shackle and the fitment location does not interfere with approach angle. Always use tow points as a matched pair, with an Equalising Bridle.

RP-NAV23

Part Number: RP-NAV23
Bar Code: 9319478634121
Navara NP300 Tow Points
Weight - 5 kgs

No Reduction in Approach Angle
