

# **SYNTHETIC WINCH ROPE**

## **AUSTRALIAN MADE**

**Strong, Light  
& easier to handle  
than steel cable**

### **Spliced Breaking Strains**

10mm - 9000kg (all colours)

11mm - 11000kg (Grey only)

12mm - 13000kg (Grey Only)

Roadsafe synthetic winch rope is Australian Made 100% 12 plait UHMWPE Fibre with polyurethane coating. The rope has a melting point of 150 degrees, specific gravity of 0.97 (floats), negative water absorption and good UV resistance. The rope is easy to splice, non-kinking and non-rotational, offers good abrasion resistance, low elongation and maximum strength to weight ratio with overall strength comparable to steel. Supplied complete with bright covered soft eye splice for high visibility and protection of splice.

### **Suits most low mount winches**

SB027-B - 10mm x 30m Blue RRP\* \$230
