

TRAC-GRABBER

COMPACT RECOVERY SOLUTION

Getting "un-stuck" is now even easier with Trac- Grabber.

Made from EPDM rubber with a webbed strap and D-Ring buckle Trac-Grabbers are designed to help a slipping tyre to extract itself from poor traction situations.

Trac-Grabbers are designed for use on cars, utes and SUV's and available in twin or four packs.

Packed in convenient weather proof bag, Trac-Grabbers offer a convenient compact recovery solution, taking up less storage space than traditional recovery tracks.

EASY TO USE!

- Tightly secure one Trac-Grabber to each drive wheel by holding the Trac-Grabber on the wheel with "D" rings on the side facing you.
- Feed the loose end of the strap through an opening in the wheel from the back side.
- Feed the end of the strap through the "D" rings, PULL TIGHT, and secure the strap with the Velcro to prevent slippage.
- Once in place, Trac-Grabbers take hold as the vehicle's wheels start to spin, they will lift and grab the tyre to help move it to more stable terrain.

Part Number TG-T01
Trac Grabber (Twin Pack)
