

ON-CAR ADJUSTABLE PANHARD ROD

COMPATIBLE WITH TOYOTA LANDCRUISER 200 & 300 SERIES 2007+

DIRECT ORIGINAL TOYOTA REPLACEMENT

The APR031 is designed so it can be a direct original Toyota 200 and 300 series replacement by fitting a standard vehicle right up to a vehicle with 100mm of suspension lift. Designed so the length of the panhard rod can be adjusted on the vehicle once it had been fitted, the APR031 has been through extensive development which includes FEA analysis, and validation through destructive testing.

- These adjustable panhard rods utilize OE rubber spec bushings which are easily serviceable and keep NVH under control.
- Manufactured out of 7mm thick steel tube, with the adjuster manufactured from high strength SAE1015 steel giving a substantial increase in strength over the original Toyota panhard rod, especially during an obstacle strike.
- The SCHNORR® safety washers are used in the locking system to ensure safe and secure locking of the adjustment mechanism is achieved.
- These high strength high quality panhard rods are finished in a high-gloss industrial powder coat finish for durability which keeps them looking great for years to come.
