

# RATED HEAVY DUTY FRONT RECOVERY POINT

COMPATIBLE WITH SUZUKI JIMNY JB74 (2018+)

The latest Roadsafe designed RPJIM04 is supplied as a pair (LH & RH point) and has been designed for fitment on the Suzuki Jimny JB74 with factory bumper and allocations for a variety of bull bar designs.

ROADSAFE, the leading supplier of rated recovery points, are excited to be bringing another Australian CAD designed, CAE engineered, FEA simulated & RATED recovery point product to the market. Now featuring an internal radius teamed with an external chamfer around the shackle eye, for improved soft shackle compatibility to prolong longevity of the ROADSAFE soft shackles in recovery scenarios.

The ROADSAFE Jimny Tow Points, when fitted correctly, make for a convenient and strong tow point system to assist with recoveries. Always fit and use two tow points as a matched pair, with equalising bridle, to maximise safety during a recovery.
