

UPPER CONTROL ARM KIT

FJ CRUISER & PRADO 150

**NOW COMPLETE
WITH BALL JOINTS**

The new heavy duty Roadsafe range of Upper Control Arms have been designed with ease of fitment & ongoing serviceability in mind, and are a necessity for various IFS models that have been lifted 30mm+.

The Roadsafe arms have been designed to restore camber & caster lost on the IFS vehicles once they have been lifted, by correcting the angle of the ball joint. Without restored camber & caster settings lifted IFS vehicles will eventually show excessive tyre wear and experience ride & steering issues.

With greater radius and tube sizing to suit per application, the designs allow clearance of the coils during articulation, with the outer radius also adjusted to allow for the fitment (in some cases) of 35" tyres without having the issue of the tyres rubbing on the arms during full lock.

Roadsafe Upper arms are designed with 3 degrees fixed caster, and are optimally suited to lifts of 30-70mm, finished in black E-Coating for maximum durability, rust prevention and discreet installation.
