50MM DROPPED SWAY BAR LINK COMPATIBLE WITH LANDCRUISER 200 SERIES KDSS

The new STB8962EXT has been designed and manufactured in a one piece forged design with OE spec rubber bushings and ball stud to replicate the OE item in function and appearance suited to KDSS 200 Series with 50mm+ suspension lift. The new link includes a 50mm drop at the swaybar mount pivot, compared to the OE arm, allowing considerably increased suspension travel for 200 series with KDSS when modified to run longer travel shocks (length to be checked & confirmed prior to fitment) and other supporting modifications such as the Roadsafe APR015 (adjustable rear panhard rod) , TALC201B (rear upper offset trailing arms) plus other 200 series components.

STB8962EXT is a DIRECT replacement for the LH Rear Link. The new extended STB8961EXT (also now available) is to be used to accommodate the RH Rear Link requirements.

Part Number **STB8962EXT**

LH Rear 50mm Dropped Sway Bar Link

Barcode 9319478650374

RRP* \$245.00
