

VEHICLE Nissan Patrol GQ / GU (Pair)

PRODUCT Heavy Duty Tow Point

PRODUCT CODE RPPAT05

BARCODE 9319478659629

The latest Roadsafe-designed RPPAT05 is supplied as a pair (LH & RH points) and has been designed for fitment on Nissan Patrol GQ & GU. The original RPPAT04 (still available) is tough... but the new RPPAT05 evolution is tougher!

Manufactured from 16mm hot rolled steel for increased tensile strength and finished in Roadsafe yellow powdercoat, you can rely on Genuine Roadsafe 4WD Tow Points to aid you in getting out of trouble. Buying Genuine Roadsafe 4WD Tow Points ensures you are getting a component that is 100% designed by Roadsafe and rated to suit the design.

The latest technology is used in the development of Genuine Roadsafe 4WD Tow Points. CAE (Computer Aided Engineering) and FEA (Finite Element Analysis) are both used in-house during development. The WLL rating is applied at 5000kgs, with a safety factor of 2 for each tow point that is then validated independently at a NATA-accredited lab by means of deformation testing locally in Melbourne.

The new Patrol Tow Points, when fitted correctly, make for a convenient and strong tow point system to assist with recoveries. Always fit and use tow points as a matched pair, with equalising bridle, to maximise safety during a recovery.

NEW DESIGN
SOFT SHACKLE COMPLIANT
