

# Hilux 4WD non IFS Steering Knuckle Arm

Commonly referred to as the 'Boomerang Arm', 'Rams Horn Arm', 'C Arm' or 'Drop Arm' the steering knuckle arm fits on top of the front hub by 4 bolts and links to the drag link. The main wear item on the steering knuckle arm is the ball stud. When replacing the steering knuckle arm, it is recommended that the drag link be refurbished either with the installation of drag link repair kits (TE442K - two required per drag link) or a new drag link (DL070).
