

Sway Bars

A full range of WHITELINE FlatOut Passenger vehicle & 4WD Sway Bars & Strut Braces are now available from Roadsafe.

As the name suggests their objective is to reduce sway, or body roll, and stabilise a vehicle under lateral (cornering) forces. Formula 1 cars still use sway bars along side the shocks and springs as it is the ONLY suspension component principally designed to control body roll.

Unfortunately, many aftermarket spring manufacturers still design their lowered springs too hard, trying to control body roll when it's the sway bars job.

The fitting of bigger Whiteline Sway bars is still the best dollar for dollar handling improvement you can make.

Why? First, while car manufacturers appreciate the role the sway bar plays in vehicle control, safety and comfort, their standard bars, like the vehicles they are fitted to, are built to a compromise of price, performance and comfort. Secondly, handling and suspension design is an evolutionary process with constant changes.

Whiteline Sway bars dramatically improve the grip, handling and performance of your vehicle. Cornering loads are spread more evenly across the tyres delivering more grip and frankly, that's what it's all about. You also get improved tyre wear as your tyres stay flatter and more upright. Comfort improves because your car sits flatter through bends meaning less movement inside the vehicle.

**NEWLY
EXPANDED RANGE**

ROADsafe

Roadsafe Automotive Products located in Braeside, Victoria, are pleased to announce the expansion of the Whiteline Flat Out range to incorporate a larger array of adjustable sway bars, alignment and bracing products. With the newly expanded range Roadsafe Automotive Products is your latest source for performance handling products.

For those new to Whiteline, the brand graces a number of performance suspension components that work hard to deliver real results and performance outcomes for vehicles and motorists the world over. Whiteline's primary focus was initially delivering 'bang for your buck' handling gains from the simplicity of an anti sway bar. But over the years, the expertise, the knowledge, the reputation and the products have grown since progressed to include additional offerings such as the range of infamous anti lift/caster kits, roll centre adjuster kits, adjustable control arms, camber kits, strut and chassis bracing.

Whiteline products are developed up by qualified and willing group of dedicated enthusiasts who are trained in the company's products and philosophy's. The R & D department drives the company to constantly find new and innovative solutions to suspension and handling problems.

Be it conventional autocross, circuit, drags, drifting or road rally Whiteline has the products and practical experience to maximise the potential of your road/race car. And even if its only to sharpen the handling of your daily driver car, this race experience guarantees a quality, tested and tuned outcome using Whiteline products.
