

# **HD TOW POINTS**

## **TRITON ML-MN**

The RP-TR102 tow points have been designed to fit on ML-MN Triton and will "NOT" fit to vehicles fitted with aftermarket bull bars or nudge bars—the only exception is an ARB bar. Drilling of the chassis is required for fitment.

FEA tested during development and Rated at 5000kgs, the Roadsafe Triton Tow Points when fitted correctly make for a convenient and strong tow point system to assist with recoveries. Always fit and use tow points as a matched pair, with equalising bridle, to maximise safety during a recovery.
