

# PANHARD ROD UPDATE

## COMPATIBLE WITH TOYOTA LANDCRUISER 76/78/79 V8

The introduction of VSC (vehicle stability control) on the 2018-on model 76/78/79 V8 Landcruisers have seen a change in the required front panhard rod length to suit. Subsequently, although the panhard rods haven't altered, the models they fit have.

With regard to Roadsafe 4WD brand panhards we have determined fitment of:

**APR010** (985mm c/c)

Suits Pre 2016 (non DPF) and Post 2018 (with VSC)

**APR018** (785mm c/c)

Suits Post 2016 (with DPF) and Pre 2019 (non VSC)

Application data is given as a guide only.

Ensure to check the required panhard rod length prior to ordering or attempting installation.

Manufacturers Names used for reference purposes only.
