

DIFF DROP KIT COMPATIBLE WITH COLORADO & D-MAX 6/12-2016

A Complete Bolt In Diff Drop Kit for RG Colorado & Isuzu D-Max (6/12-2016) is now available to suit these popular Strut Front end models with raised suspension. The Roadsafe DDCOL02, once fitted, will drop the inner CV Joint approx. 30mm, and has been designed to suit for lifts of 2-4". The kit comes complete with new Crossmember and alloy spacers. The Crossmember is manufactured from solid flame cut 15mm steel, with a recessed machined diff mounting boss, to avoid damage to the diff bolt head when offroading. The Crossmember is e-coated and powder coated black, for increased longevity and discreet fitment, and can be used with aftermarket or factory protection plates. The spacers are machined alloy, in black, and supplied complete with new mounting bolts - including a shorter bolt specific to D-Max installations only.

Part Number DDCOL02

Diff Drop Kit

Compatible with Holden Colorado
& Isuzu D-Max (6/12-2016)

Barcode 9319478620902
