DIFF DROP KIT COMPATIBLE WITH LANDCRUISER 200 SERIES

When lifting the 200 series cruiser, the Constant Velocity (CV) joints are put on an increased angle. This increased angle of the CV joint during operation can accelerate the wear on the joint, as well as putting additional stress on the CV boots leading to splitting and eventually premature failure of the CV. The wear is accelerated further if larger (wider) wheels and tyres are fitted. The Roadsafe Diff Drop Kit is supplied complete with CNC Machined spacers and fitting kit. The bolt on kit corrects the geometry on the front driveshaft and CV's, lowering the diff by approx. 25mm, thus reducing the angles the CV joints need to operate on, and avoiding the expensive replacements of CV's and boots.

Part Number DDLC200

Diff Drop Kit compatible with
Landcruiser 200 Series

Barcode 9319478603134

RRP \$165.00
