## REDESIGNED FRONT DIFF GUARD COMPATIBLE WITH NISSAN PATROL GQ / GU

**REDESIGNED PROFILE TO ENSURE MAXIMUM CLEARANCE TO THE DIFF GUARD AT FULL COMPRESSION OF THE SUSPENSION WHERE AFTERMARKET PANHARD RODS ARE FITTED**

Manufactured from a combination of 6 & 8mm thick plate, the Roadsafe 4WD Patrol Front Diff Guards provide that extra protection you need for your ring gear when off-roading. Taking just 10 minutes to fit, the Diff Guard simply bolts on to the diff housing using hardware supplied.

We got sick of the other Diff Guards rolling backwards after a knock, so have designed this one to bolt through the radius arm mount, and clamp the diff housing, so there are strong mounting points keeping the guard in place. Additionally, the shape has been refined to run as close as possible to the original diff housing, including a re-designed reduced finish height, to maximise clearance for aftermarket panhards.

- REDUCED FINISHED HEIGHT TO MAXIMISE CLEARANCE**
- MOUNTS USING RADIUS ARM BOLT FOR SECURE POSITIONING**
- ALLOWS FOR CONTINUED EASY ACCESS TO FILL & DRAIN HOLES**
- SLOTS FOR HIGH PRESSURE HOISING - TO CLEAR ANY TRAPPED DIRT/DEBRIS AFTER OFFROAD ADVENTURES**
- PROVIDING CLEARANCE TO WORK IN CONJUNCTION WITH DIFF SPACERS (RASWNIS) AND DROP BOXES (DBPATB)**

**Part Number SB011V2**
