HEAVY DUTY UPPER CONTROL ARM KIT

COMPATIBLE WITH **FORD RANGER PJ/PK & MAZDA BT50 (GEN1)**

The new Blackhawk 4x4 UCA's suited to makes between 2008-2012 will add an extra 2 degrees of caster over the OE arms. This allows the OE style shim adjustment at the chassis to be used for camber only, simplifying and reducing the need for excessive amounts of shims.

Supplied complete with a brand new OE spec forged pivot bolt with new OE spec rubber bushings. Following traditional Blackhawk design the ball joint plate has been angled to maximise the potential for suspension travel whilst also being fitted with a high angle HD greasable ball joint.

- **Increased clearance to strut allowing increased droop**
- **2 degree increase in caster**
- **New OE spec pivot bolt & rubber bushings**
- **300mpa DOM (drawn over mandrel) tube**
- **6mm wall thickness**
- **Improved clearances to tyre/rim combos**
- **Rotated ball joint mount for potential of increased articulation**

Part Number UCA3956R

Blackhawk 4x4 Upper Control Arm Kit compatible
with Ford Ranger PJ/PK & Mazda BT50 (Gen1)
