LOCKING HITCH PIN SET

10,000KG DOUBLE SHEAR RATED

All Mister Hitches hitch pins are made from S235JR/Q235B carbon steel. The Tensile strength is 375MPa & Yield strength is 235MPa. This is equivalent to a grade 4.6 bolt or dowel pin which has a "Single Shear strength" of 50Kn (5,099kg) and a "Double shear strength" of 100Kn (10,197kg). When the pin is use in a tow bar hitch receiver situation the "Double Shear" value applies.

FEATURES

- Convenient Keyed Alike Twin pack
- Smooth Locking action
- Useable effective length of up to 70mm
- Suitable for most 50mm square hitch applications
